Subject: (Code)

, FF

Introduction to Web Programming Semester: 2nd BE (22PL15B/25B) Date:21/11/2023 Duration: 90 minutes Staff: Dr.Pratiba D Name: USN: Section: PART-A M BT Co Design an XHTML code for constructing a following table to illustrate table handling in a web page. Properly align cells, give suitable cell padding and cell 10 L2 2 spacing, and apply bold and emphasis necessary. SAMPLE MENU TIMETABLE Timings 9.00-11.00 Idly. Day 1 Dosa Pongal 11.00-11.30 Tea Break 5.00-6.00 Snacks 8.00-9.00 Dinner Breakfast Day 2 9.00-11.00 Break 2.30-3.30 Create a web site using HTML for an online super market. Your website should Lunch 10 L3 2 have a home page which helps the user to navigate to various other pages. Every web page in the website give a detailed description of different items present in the super market and must be stored in separate documents that are accessible through links from the home document. Make a website user friendly by adding relevant images and other options. The last web page should present a feedback form for the customer. Design a web page with the following requirements: 6 L2 2 The webpage should have two frames in one column. Two frames of size 45 percent and 55 percent. One frame should have at least four links and another frame will display those documents. The links must be names of vehicles; the documents must be at least oneline description of the vehicles. What is the purpose of an External style sheet in CSS? Give an example. L1 Create an XHTML document to create a list of items with the following contents. 4 4. STATE1 AA BB 3. R V College of Engineering Department of Computer Science and Engineering CIE - II: Question Paper Subject: Introduction to Web Programming (CS115AI) (Code) Semester: 1st BE Date: 28/12/2023 Duration: 90 minutes Staff: Dr.Pratiba D Name: USN: Section: PART-A BT Co Explain the following selector forms with an example for each. 10 a. Simple Selector L1 2 b. Class Selector c. Generic Selector d. Id Selector Create a web page by writing an HTML document that has an image with the L2 2 following properties: Only one copy of the image should be included. The horizontal alignment should be left and vertical alignment should be center. Background color of the web page should be pink. All the border style, width and color should be different for all the sides of a border. Design a web page with a banner text "mylonglongname" on it. 2b. L2 2 Each character of the banner text will have a different size. First character starts with a font size of 1. Next characters will have sizes 2 to 7. When you reach 8th character, use the size 7 again and then decrease the size until you reach the last character (which will again have font size of 1). Write a program to make a simple calculator to perform the arithmetic operations L3 3. (Addition, Subtraction, Multiplication and Division) in JavaScript. I) Simple Calculator using else if ladder II) Simple Calculator using switch statement Note: The user is prompted to enter an operator (either +, -, * or /) and two numbers. What is the purpose of Date object in JavaScript? List and explain any 5 methods L1 3 that retrieve information from the Date object with an example for each. Write a JavaScript program to input a string using prompt() method and convert L2 3 that into uppercase.[Use string object method] Write the XHTML code to achieve the below output with correct styling. L4 2 10 5. Write code to achieve the below output with correct styling.

RV COLLEGE OF ENGINEERING®

(An Autonomous Institution affiliated to VTU)

I / II Semester B. E. Regular / Supplementary Examinations Feb-2024

Common to all programs INTRODUCTION TO WEB PROGRAMMING

Time: 03 Hours

Maximum Marks: 100

Instructions to candidates:
 Answer all questions from Part A. Part A questions should be answered in first three pages of the answer book only.

 Answer SIX full questions from Part B. In Part B question numbers 2 and 11 are compulsory. Answer any one full question from 3 and 4, 5 and 6, 7 and 8 & 9 and 10. Question number 11 is lab component (compulsory).

PART-A

1.1	Define the following:	
	a) Web	02
	b) Internet	01
1.2	What is meant by an empty tag in HTML?	01
1.3	What are the different types of headings in HTML?	02
1.4	Mention some advantages of JavaScript.	
1.5	Write the output of the following:	
	JavaScript code:	
	<pre>< script type = "text/javascript" ></pre>	
	var a = 1; var b = 0;	1
	$while(a \le 3)$	1
	1	
	a++	1
	b+=a*2	
	print(b);	
	3	01
		01
1.6	How do you insert an image in HTML?	01
1.7	How do you write a comment in JavaScript?	0
1.3	Define Schema and Instance with respect to database.	

PART-B

2	a	With a neat diagram, explain the basic structure of a DNS server.	07
	b	Explain the following: i) URL ii) Web Browser iii) Web server.	07
3	а	With a suitable code snippet, explain the "Text formatting tags" in HTML.	07

	b	With a suitable code snippet explain, which HTML tags are used while displaying the data in the tabular form?	0'
		OR	
4	а	Design a web page using forms in HTML to demonstrate the following:	
		FIRST FORM: First name:	
		Last name	
		SUBMIT RESET	07
	b	Demonstrate lists in <i>HTML</i> . Give examples to implement various types of lists in <i>HTML</i> .	07
5	a	Explain in detail about different types of selectors in CSS with example.	07
	b	With example code, list the difference between <div> and tag in HTML.</div>	07
		OR	
6	а	List and explain the levels of style sheets in CSS with an example code snippet.	07
-	b	With a neat diagram, explain the difference between margin and padding.	07
7	a b	With a sample code snippet, discuss the different types of conditional statements in Java script. Write a Javascript program to construct the following pattern, using a nested for loop.	07
		* * * * *	
1		****	07
1	_	OR	
	8 a	five numbers. Display an alert box to show the results	7
	9 a	Define relational database management system. Discuss the key system. System.	7
		07	7

while

b	Create a database with the name employee to perform the following activities:	
	 i) Create table with name Employee details including the following fields. Emp_id,emp_name, emp_designation and emp_age. ii) Inserting data into the table. iii) Query to find an employee whose name is not XXXXX iv) Query to find the employee whose designation is not General Manager and not store manager. 	
	OR	
1.0		
10 a	Explain the following: i) SQL	
	ii) Key Features of <i>SQL</i> .	07
ъ	Create a table with the name Person including the following fields PersonID, Lastname, Firstname, Address and city to perform the following activities.	
	i) DROP TABLE ii) TRUNCATE TABLE statement	
	iii) ALTER table	
	iv) To delete a column in a table	
	v) To rename a column in a table	0.5
	vi) To change the data type of a column in a table.	07

LAB COMPONENT

11	а	Write an XHTML code snippet to demonst i) Radio Button ii) Check box.	trate the use of the following:	10
	b	Write a JavaScript program that compute following students. Then this average corresponding grade.		
		Student name	Marks	
		David	80	
-		Vinoth	77	
		Divya	88	
		Ishita	95	
		Thomas	68	
		The grades are computed as follows:		
		Range grade:		
		< 60 F		
		\geq 60 and $<$ 70 D		
		\geq 70 and $<$ 80 C		- 1
		> 80 and < 90 B		10
1		≥ 90 and < 100 A		10
